

Apache OFBiz: Order Fulfillment Lifecycle

Demonstrating the end-to-end processing of a sales order, from picklist generation to final completion.

Prepared by: Adarsh Raghuwanshi
Location: Indore, MP

Report Overview: This document outlines the step-by-step fulfillment of Order **WSC010000** within the Apache OFBiz Facility and Order Manager modules. It covers managing picklists, verifying items, packing the shipment, generating the packing slip, and confirming the completed order status.

1. Order Initiation & Picklist Generation

Following the creation and approval of sales order **WSC010000** for the product *Rainbow Gizmo* (*GZ-1004*), the fulfillment process begins in the Facility manager. A picklist (**Picklist ID 10000**) is generated to guide warehouse staff in picking the required inventory from the designated bins.

4. Packing Slip Generation

To accompany the physical package, a standardized PDF packing slip is generated by OFBiz. This document details the Shipment ID (**#10000**), the corresponding Order ID, and the destination address.

5. Shipment Tracking & Status

After packing, the shipment tracking record reflects the update. Searching the **Shipments** menu displays Shipment **10000** (Outgoing - Sales Shipment) transitioning to the **Packed** status, originating from the Web Store Warehouse.

6. Final Order Completion

The final step in the lifecycle is to confirm that the order accurately reflects the fulfillment actions. Returning to the Order Manager's **Order List**, Order **WSCO10000** is now correctly listed with a **Completed** status, finalizing the processing workflow.
